At this URL:

https://isip.piconepress.com/courses/temple/ece_1111/

You can click on the syllabus link on the left and find the updated syllabus for Fall 2022.

Please take a moment to familiarize yourself with it. There are a lot of resources linked from this page.

The first homework and lab have been assigned, so we are off and running.

I will usually post the lectures and related materials for the following week on Thursday night. This week you have three lectures, a lab, a homework assignment... and a surprise quiz on Friday morning.

The contact information for your TA and peer mentor are provided in the syllabus. You will quickly learn to contact them when you need help. They can be easily reached using the listserv:

ECE 1111 Help <temple_engineering_ece1111_help@googlegroups.com>

As I promised at the beginning of the summer, we are going to dive right into programming and move very fast in this course. I hope you have learned emacs by now 😊

-Joe
