Here is a short tutorial on how to compile in emacs:

https://isip.piconepress.com/courses/temple/ece_1111/resources/tutorials/tips_emacs/20220825_compiling.mp4

and a short one on how to debug in emacs:

https://isip.piconepress.com/courses/temple/ece_1111/resources/tutorials/tips_emacs/20200201_debugging.mp4

We won't require you to debug in emacs, but we will ask you to compile code in emacs using makefiles.
