One of the languages we will cover in ECE 1111 is Python (in the last third of the course).

One of the things we will stress in all languages is conformance to style guides. All organizations have these kinds of standards.

Here is a good example from Google that one of my students, Phuykong Meng, recently found:

 https://google.github.io/styleguide/pyguide.html

It gives you an idea of what they expect when you write Python code. We call this aesthetics:
