To: ECE 1111 <temple_engineering_ece1111@googlegroups.com>
CC: Jared Michael Levin <jared.levin@temple.edu>

During our first lecture, an ECE 1111 alum, Jared Levin, will stop by and introduce you to the Robotics Club. Here is a synopsis from Jared:

Hello everyone! My name is Jared Levin, and I am the current President and Programming lead of Temple Robotics, as well as an Alumni of Dr. Picone's ECE 1111 class. Temple Robotics participates in NASA's annual Lunabotics competition, which intends to have students design and create a robot designed for the exploration and excavation of the moon's surface. This year we will be creating an all-new bot for the first time since before 2019, so we will have a lot of fun work to do. With that said, we welcome people of all experience levels and would love to see some of you come check us out.
