As of today, only 2 out of 31 students have completed the graded extra credit assignments (worth a total of 450 points).

Here is what the summary statistics look like. Eight people have not completed any of them 🙄

All I can tell you is that this stuff is easy compared to what you will face in this course. Things will move very quickly starting with the first class.

We are two weeks away from our first class. Your extra credit assignments are due by the beginning of the first class.

There are 31 students in the class and 6 extra credit assignments per student, for a total of 186 entries.

Only 50 cells have been filled thus far - a 27% completion rate. That is not good. You can do better!

Please do not leave these to the last minute. There will be no exceptions.

Some of you will argue that you didn't read your Temple email all summer. Some will try to make an advising appointment and find out that our advisors are fully booked. Either way, these are not my problems.

I hope you will complete these assignments, especially learning emacs, before the semester begins.
