To: temple_engineering_ece1111 <temple_engineering_ece1111@googlegroups.com>

Each of you has received a message with account information that looks like the message below.

The first message mistakenly listed your username as "_tuXXXXXX". Ignore that message.

The second message should show your username as your Temple Accessnet username. You will need to log in and reset your password.

This task must be completed as soon as possible. It only takes a minute and is a requirement for ECE 1111.

If you have any questions, send an email to help@nedcdata.org.

-Joe

Subject: NeuroNix Account
Date: Thu, 30 May 2024 13:59:59 -0400
From: NEDC Administrators <isip.nedc@gmail.com>
To: tuXXXXXX@temple.edu
CC: joseph.picone@gmail.com, help@nedcdata.org

This email contains important instructions about your Temple ECE account on the Amazon cluster.

Your username and password to log into NeuroNix are:

username: tuXXXXXX
password: YXXXXXXXXXXXX

Mac or Linux Users: You can do most of what you need to do from the command line using your Terminal tool. For more information on that, see:

https://www.youtube.com/watch?v=QR0X039ck08&ab_channel=Mac0SPro

Windows Users: You will need to download and install a terminal client. We recommend MobaXterm: <http://mobaxterm.mobatek.net>.

To reach the cluster, you can use the ssh command:

```
$ ssh tuXXXXXX@ece-000.eng.temple.edu
```

using the username and password above.

Please login ASAP and change your password. The first time you log in you will be prompted to enter a new password. The password on these machines is separate from the password on the Temple network, so you will have to manage these manually. If you have any problems, please email help@nedcdata.org <<mailto:help@nedcdata.org>>.

After you login you can setup your ssh keys to get password-less login. The command below will copy your keys from your remote machine.

```
$ ssh-copy-id tuXXXXXX@ece-000.eng.temple.edu
```

Windows Users: If you are having trouble setting up your account using MobaXterm, please consult this video:

https://www.isip.piconepress.com/courses/temple/unvs_0822/resources/cluster_login.mp4

Regards,

NEDC System Administrators
