

**The Temple student chapters of SWE and IEEE
invite you to attend a mentoring session:**

Women in Engineering: About That Life Plan You Don't Have Yet...

**Katherine Degerberg
Principal Systems Engineer, SYSTOLIC, Inc.**

Friday, January 24, 1 PM – 4 PM, ENGR 301A

Come talk, listen, and support other women, while learning how to successfully navigate your career choices in a very exciting but challenging field. According to the IEEE, women account for only 19% of engineers. Since most developed countries are aging rapidly and/or experiencing zero population growth, recruiting and retaining women engineers has become a crucial strategic issue. Refreshments will be provided.

**If you are interested in attending,
please contact Lilly Veloso <lilly@temple.edu>.
Limited seats remain, so please act fast.**
